Experience

Poulima Infotech

Nov 2023 – Present

Software Engineer

Remote

- Developed responsive, data-driven web applications using **React.js** and **JavaScript (ES6+)**, building reusable UI components aligned with enterprise design systems for a platform serving 10,000+ active users.
- Enabled the visualization of real-time wallet and transaction data via seamless integration with backend REST APIs and microservices.
- Managed complex application state using **Redux and Context API**, delivering high-performance, data-rich dashboards that abstract core platform data.
- Hosted and deployed frontend assets utilizing **AWS (S3, CloudFront)**, collaborating closely with UX designers to ensure cross-browser compatibility and an intuitive digital journey.

UBK Infotech

May 2023 – Oct 2023

Software Engineer

Kolkata, West Bengal

- Built responsive frontend components for a multi-tenant platform using **React** and modern **HTML5/CSS3**, supporting 5,000+ daily users and complex administrative workflows.
- Investigated and resolved cross-browser compatibility and accessibility issues, executing UI performance optimizations that eliminated rendering lag during peak usage.
- Integrated real-time WebSocket notifications and RESTful APIs directly into the UI, enabling seamless data flow for client management dashboards.

Projects

[Telugu Calendar Panchangam](#) | *React Native, SQLite, Node.js*

1M+ Downloads

- Engineered and scaled an intuitive, high-performance mobile application driving organic growth to **1 Million+ downloads** while maintaining a stellar **4.2/5.0 rating**.
- Profiled and debugged frontend rendering pipelines, optimizing local data retrieval and state management to ensure seamless UI performance on constrained devices.

[AstroAvastha Platform](#) | *React.js, TypeScript, REST APIs*

Live

- Owned the frontend architecture of a complex marketplace, building testable, reusable UI components for real-time chat, wallet transactions, and interactive data visualizations.
- Evaluated and adopted modern state management patterns (**Redux/Context API**) and API integration strategies to simplify code structure and boost UI performance.

[Topskyll - Code Engine](#) | *Next.js, REST APIs, PostgreSQL*

Live

- Developed a clean, responsive **Next.js** frontend interface for a remote execution engine, prioritizing intuitive client journeys, accessibility, and strict cross-browser compatibility.

Technical Skills

Frontend: React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, React Native

State Management & Integration: Redux, Context API, REST APIs, GraphQL, WebSocket

Backend & Data: Node.js, Express.js, TypeScript, PostgreSQL, MongoDB

DevOps & Performance: AWS (CloudFront, S3), Git, UI Performance Optimization, Cross-Browser Debugging

Certifications

Full Stack Web Development | *Masai School*

Jun 2022 – Apr 2023

- Completed intensive **30-week** military-style coding bootcamp (**1200+ hours**). [\[Certificate\]](#)

Education

Amity University

Bachelor of Computer Applications — Concurrent with Full-time Job
